

ELECTRICAL DANGER NOTIFICATION

Notification Number

This electrical danger notification should not be ignored and the dangers identified need to be rectified immediately

ADDRESS AND SPECIFIC LOCATION OF THE DANGEROUS CONDITION

Address and
specific location

DETAILS OF THE DANGEROUS CONDITION

While at the premises/location below, an electrical condition has been observed which in the opinion of the competent person issuing this notification constitutes a real and immediate danger to the property or the users of the electrical installation. **The person or persons having responsibility for the electrical installation or equipment have a duty to ensure that appropriate action is taken to remove the danger without delay.** The competent person issuing this notification will be able to provide specific advice.

**Dangerous
condition**

The dangerous condition report detailed above may result in risk of injury or loss from one or more of the following:

Electric shock

☐

Burns from hot surfaces

☐

Mechanical movement of electrically actuated equipment

☐

Explosion

☐

Power supply interruptions and/or safety circuits

☐

Arcing or burning, excessive pressure and/or toxic fumes

☐

Fire

☐

Burns from the passage of electrical current

☐

IMMEDIATE ACTION TAKEN

Date:

Time:

FURTHER URGENT ACTION RECOMMENDED

NOTES FOR RECIPIENTS

IF YOU ARE NOT THE PERSON RESPONSIBLE FOR THE SAFETY OF THE ELECTRICAL INSTALLATION/ EQUIPMENT CONCERNED, IT IS IMPORTANT THAT YOU PASS THIS NOTIFICATION TO SUCH PERSON WITHOUT DELAY

The electrical contractor detailed on page 1 of this Notification has found that a part or parts of the electrical installation identified on page 1 of this Notification are in a potentially dangerous condition. The safety of those using the installation may be at risk.

Appropriate action needs to be taken immediately to remove the danger. The action taken (such as switching off and isolating the affected part(s) until remedied) should be recorded on page 1 of this Notification.

Urgent remedial work is necessary to bring the electrical installation up to the standard required by the current issue of the national standard for the safety of electrical installations, British Standard 7671 - *Requirements for Electrical Installations*. The electrical contractor issuing this Notification will be able to provide further advice.

This notification is intended to be issued only for the purpose of reporting a dangerous condition in an existing electrical installation. The notification records only damage, deterioration, defects, dangerous conditions and any non-compliance with the requirements of the national standard for the safety of electrical installations which give rise to real and immediate danger. It is not a detailed or comprehensive report on the condition of the electrical installation or equipment concerned. A periodic inspection of the electrical installation may be necessary to determine the full extent of any deficiencies.

Should a person having responsibility for the safety of the electrical installation have reason to believe that the issue of this notification is unjustified, they should, in the first instance, raise the specific concerns in writing with the electrical contractor. If the concerns remain unresolved, they may make a formal complaint to the registration body to which the electrical contractor is registered, details of this organisation can be found on page 1 of this Notification. Each approved organisation has a standard complaint form that can be downloaded, or one can be obtained from the electrical contractor. A list of approved organisations appears below.
