

HIGHEST YIELDS – LOWEST RISKS

Inverters are essential in every PV plant, and their efficiency is a key factor for calculating the yield in kilowatt hours. The inverter establishes the performance of the entire PV power plant, which ensures the stability of your cash flow.

CUTTING-EDGE TECHNOLOGY MADE PROFITABLE

SMA inverters are increasing the yields of PV power plants across the globe. Projects up to the three-digit megawatt range are implemented with SMA inverters. The Utility Grade seal of quality guarantees the reliability and success that are needed to transform PV power plant projects into highly profitable investments. As the technology and world market leader, SMA helps create the basis for low-risk, yet attractive, safe, and profitable investments, from which investors, banks, and PV power plant operators all profit.

A variety of PV projects in the multi-megawatt range give impressive proof of the expertise available at SMA Solar Technology AG. To ensure excellent quality, 1000 development

experts are working to create new products and optimize existing technologies. The Sunny Central inverters from the CP series have withstood extreme weather conditions in stress testing, proving that SMA quality can achieve maximum output even under the harshest conditions.

LEADING GRID MANAGEMENT FUNCTIONS

SMA technology is also the global leader in grid integration. For years, SMA has been providing customized answers to the requirements of power plants worldwide. In addition to grid stability, flexible control systems mean guaranteed maximum availability of your PV power plant, with response times in seconds.

WORLDWIDE SECURITY

The excellent service provided by SMA across the globe greatly contributes to profitability and investment safety. SMA Solar Technology AG has a total of 90 customer service stations on six continents. The company's flexible service contracts guarantee the highest availability to customers and investors alike, providing the highest yield with the lowest risk.

THOMAS GÖTZ

VICE PRESIDENT STRATEGIC SALES,
POWER PLANT SOLUTIONS SMA

"Stable cash flow from your investment is guaranteed through cutting-edge technology, comprehensive system solutions, first-class project support, and a global service network with warranty contracts covering the entire 25-year warranty period."
