

## Form no :

**To be used only for minor electrical work which does not include the provision of a new circuit**

1. Description of the minor works
2. Location/address
3. Date minor works completed
4. Details of departures, if any, from BS 7671:2008 as amended
5. Details of permitted exceptions (Regulation 411.3.3). Where applicable, a suitable risk assessment(s) must be attached to this Certificate.

Risk assessment attached ☐

1. System earthing arrangement	<input type="radio"/> TN-C-S	<input type="radio"/> TN-S	<input type="radio"/> TT
2. Method of fault protection			
3. Protective device for the modified circuit(s)	1. Type 2. Type 3. Type		

Comments on existing installation, including adequacy of earthing and bonding arrangements (see Regulation 132.16):

		Continuity (1 column only)		Insulation resistance		Polarity	Zs	RCD (if applicable)		
Cct no	Circuit description	R1+R2 (Ω)	R2 (Ω or X)	Line / Line (MΩ)	Line / Earth (MΩ)	(X)	(Ω)	1x I <sub>Δn</sub> (ms)	5x I <sub>Δn</sub> (ms)	Test button (X)
1						<input type="checkbox"/>				<input type="checkbox"/>
2						<input type="checkbox"/>				<input type="checkbox"/>
3						<input type="checkbox"/>				<input type="checkbox"/>

I CERTIFY that the said works do not impair the safety of the existing installation, that the said works have been designed, constructed, inspected and tested in accordance with BS 7671:2008 (IET Wiring Regulations), amended to (date) and that the said works, to the best of my knowledge and belief, at the time of my inspection, complied with BS 7671 except as detailed in Part 1 above.

Date:

## **MINOR ELECTRICAL INSTALLATION WORKS CERTIFICATE**

### **NOTES:**

The Minor Works Certificate is intended to be used for additions and alterations to an installation that do not extend to the provision of a new circuit. Examples include the addition of socket-outlets or lighting points to an existing circuit, the relocation of a light switch etc. This Certificate may also be used for the replacement of equipment such as accessories or luminaires, but not for the replacement of distribution boards or similar items. Appropriate inspection and testing, however, should always be carried out irrespective of the extent of the work undertaken.

## **MINOR ELECTRICAL INSTALLATION WORKS CERTIFICATE**

### **GUIDANCE FOR RECIPIENTS (to be appended to the Certificate)**

This Certificate has been issued to confirm that the electrical installation work to which it relates has been designed, constructed, inspected and tested in accordance with British Standard 7671 (the IET Wiring Regulations).

You should have received an “original” Certificate and the contractor should have retained a duplicate. If you were the person ordering the work, but not the owner of the installation, you should pass this Certificate, or a copy of it, to the owner. A separate Certificate should have been received for each existing circuit on which minor works have been carried out. This Certificate is not appropriate if you requested the contractor to undertake more extensive installation work, for which you should have received an Electrical Installation Certificate.

The Certificate should be retained in a safe place and be shown to any person inspecting or undertaking further work on the electrical installation in the future. If you later vacate the property, this Certificate will demonstrate to the new owner that the minor electrical installation work carried out complied with the requirements of British Standard 7671 at the time the Certificate was issued.
