## WORK EXPERIENCE

---

### Labourer

**AFKS constrction and joinery** - London  
November 2019 to Present

This job is mainly for experience in the construction industry, my main work is to just clean up and move things and machinery around and from time to time I work with the painters and decorators. I also have a broad understanding of health and safety in construction as I deal with most minor injuries and am able to take people through a brief induction before they get their proper one, or if they are unable to. As I am just a general laborer I have had the chance to work with all trades electric, plumbing, and Carpentry. Because of this, I am able to work under pressure and think quickly on the spot.
